**FORM NOTES FOR FORM 13**

As a component of the D-70 Integrated Community Systems for Youth with Special Health Care Needs grant, the CYSHCN has begun development and recruitment of a Youth Advisory Council (YAC).

The YAC is designed to provide youth and young adults with opportunities to learn about leadership, advocacy, and to be a part of a state wide initiative to improve system delivery for all children and youth with special health care needs. YAC members will have the opportunity to attend various leadership and advocacy skill building trainings, work with other youth their age (both locally and across the state), and to participate in a variety of meetings about specific issues or topics. Youth will be asked to share their experiences and ideas in order to help the program identify what is needed to improve transition services for youth and their families.

Please review Form 13A, attached under the "Other Program Activities" section in the State Narrative menu. Form 13A provides our report of Youth Involvement within the CYSHCN program and outlines the efforts surrounding our Youth Advisory Council.

**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: KS**

SP(Reporting Year) # 1

**PERFORMANCE MEASURE:**

The percent of women in their reproductive years with public or private health insurance coverage

**STATUS:**

Active

**GOAL**

All women receive early and comprehensive health care before, during and after pregnancy.

**DEFINITION**

N/A

**Numerator:**

The number of female residents ages 18-44 who report they have health care coverage in the time period.

**Denominator:**

The number of female residents ages 18-44 in the time period.

**Units:** 100    **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

1-1: Increase the proportion of persons with health insurance to 100%.

**DATA SOURCES AND DATA ISSUES**

Behavioral Risk Factor Surveillance System. Weighted data. Usual biases with self-reporting apply.

**SIGNIFICANCE**

Access to health services including preventive, primary care, and tertiary care often depends on whether a person has health insurance. NHIS data show that Medicaid expansions lead to increases in enrollment and enhanced utilization of services. Kansas Medicaid eligibility is at the federally required minimum for women of reproductive age, regardless of pregnancy status.

SP(Reporting Year) # 2

**PERFORMANCE MEASURE:**

The percent of women who report cigarette smoking during pregnancy

**STATUS:**

Active

**GOAL**

Reduce preterm births and low birth weight.

**DEFINITION**

N/A

**Numerator:**

Number of resident live births with tobacco use indicated on the certificate of live birth in the reported time period.

**Denominator:**

Number of resident live births in the reported time period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16-17c. Increase abstinence from cigarettes among pregnant women to 99%.  
The U.S. baseline was 13% of pregnant women reported cigarette smoking (1998).

**DATA SOURCES AND DATA ISSUES**

Kansas Vital Statistics. While prenatal smoking is believed to be somewhat underreported on the certificate of live birth, the trends and variations in maternal smoking based on birth certificate data have been largely corroborated by data from nationally representative surveys.

**SIGNIFICANCE**

Cigarette smoking during pregnancy adversely affects the health of both mother and child. The risk for adverse maternal conditions (e.g., premature rupture of membranes, abruption placentae, and placenta previa) and poor pregnancy outcomes (e.g., neonatal mortality and stillbirth, preterm delivery, and sudden infant death syndrome) is increased by maternal smoking. Infants born to mothers who smoke weigh less than other infants, and low birthweight (<2,500 grams) is a key predictor for infant mortality. Kansas baseline for 2003 is 12.1% of pregnant women smoked cigarettes per Perinatal Casualty Report.

SP(Reporting Year) # 3

**PERFORMANCE MEASURE:**

The percent of mothers who breastfeed their infants at least 6 months

**STATUS:**

Active

**GOAL**

Increase the incidence and duration of breastfeeding.

**DEFINITION**

Breastfeeding is defined as including any amount of breast milk in the infant's diet.

**Numerator:**

Unduplicated number of infants who turned 6 months of age during the reporting period by/on their date of visit who breastfeed at least 6 months.

**Denominator:**

Unduplicated number of infants who turned 6 months of age during the reporting period by/on their date of visit.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16 -19: Increase the proportion of mothers who breastfeed their babies at least 6 months

**DATA SOURCES AND DATA ISSUES**

Pediatric Nutrition Surveillance System (PedNSS), CDC, Kansas WIC program. This data represents Kansas families with incomes below 185% of the poverty level.

**SIGNIFICANCE**

Studies show that breastfed infants have improved health and reduced medical costs. Breast milk lowers the risk of the baby developing asthma, ear infections, respiratory infections, and obesity. Studies also show reduced Medicaid expenditures for breastfed babies of \$478 during the first 6 months of life. Breastfeeding also strengthens the nurturing relationship between a mother and her child, promoting stronger family bonds and positive self-esteem for mothers. The American Academy of Pediatrics (AAP) recommends that an infant be breastfed without supplemental foods and liquids for the first 6 months of age (known as exclusive breastfeeding). Baseline: 2003 NIS data, CDC - 37.3% of Kansas women were breastfeeding at 6 months. 2003 PedNSS data for Kansas WIC program - 19.6% of WIC women were breastfeeding at 6 months.

SP(Reporting Year) # 4

**PERFORMANCE MEASURE:**

The percent of children and adolescents that receive behavioral/mental health services

**STATUS:**

Active

**GOAL**

To improve access to behavioral/mental health services for children and adolescents.

**DEFINITION**

N/A

**Numerator:**

Number of children and adolescents (ages 0-21)that receive behavioral/mental health services through Kansas community mental health centers

**Denominator:**

Number of children and adolescents (ages 0-21)in Kansas in the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

18-6. Increase mental health screening and assessment in primary care

18-7. Increase proportion children with mental health problems getting treatment

**DATA SOURCES AND DATA ISSUES**

Kansas Department of Social and Rehabilitation Services, Community Mental Health Center data

**SIGNIFICANCE**

Significance: The Surgeon General's Report on mental health indicates that about 20 percent of children have mental disorders with at least a mild functional impairment. Additionally, about 11% of these children are diagnosed, but not treated. Kansas MCH improves screening of children and youth in school and public health settings by providing training and support to professionals.

SP(Reporting Year) # 5

**PERFORMANCE MEASURE:**

The percent of children who are overweight

**STATUS:**

Active

**GOAL**

Reduce the percent of children who are overweight.

**DEFINITION**

Overweight is defined as children with BMI-for-age  $\geq$  95th percentile.

**Numerator:**

Unduplicated number of enrolled WIC participant children ages 2-<5 at  $\geq$  95 percentile during the reporting period.

**Denominator:**

Unduplicated number of enrolled WIC participant children ages 2-<5 during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

19-3. Reduce the proportion of children and adolescents who are overweight or obese to 5%.

**DATA SOURCES AND DATA ISSUES**

Pediatric Nutrition Surveillance System (PedNSS), CDC, Kansas WIC Program - Table 2C, Summary of Health Indicators Children ages 2-<5. Kansas baseline is 12.6% in 2003.

**SIGNIFICANCE**

Maintenance of healthy weight is a major goal to reduce the burden of illness and its consequent reduction in quality of life and life expectancy. Patterns of healthful eating behavior need to begin in childhood and be maintained throughout adulthood. Overweight and obesity acquired during childhood or adolescence may persist into adulthood and increase the risk for some chronic diseases later in life.

<b>PERFORMANCE MEASURE:</b>	The rate of adolescent deaths due to motor vehicle crashes when using no seat belt
<b>STATUS:</b>	Active
<b>GOAL</b>	Reduce preventable injuries and deaths among children and adolescents.
<b>DEFINITION</b>	<p>N/A</p> <p><b>Numerator:</b> Number of deaths to adolescents ages 15-19 caused by motor vehicle crashes when using no seat belt.</p> <p><b>Denominator:</b> Number of adolescents in Kansas ages 15-19 in the reporting calendar year.</p> <p><b>Units:</b> 100000   <b>Text:</b> Rate</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	15-15. Reduce deaths caused by motor vehicle crashes
<b>DATA SOURCES AND DATA ISSUES</b>	Fatal Accident Reporting System (FARS), U.S. Department of Transportation. This data excludes occupants in motor vehicle types such as buses, motorcycles, mopeds, all-terrain vehicles, snowmobiles, farm equipment, and unknown body types.
<b>SIGNIFICANCE</b>	Unintentional injuries are the leading cause of death for Kansas adolescents and injuries, both intentional and unintentional, are the most significant health problem affecting Kansas youth.

SP(Reporting Year) # 7

**PERFORMANCE MEASURE:**

The percent of infants with special health care needs who receive care within a medical home

**STATUS:**

Active

**GOAL**

Increase the number of infants with special health care needs who have a medical home.

**DEFINITION**

This SPM was chosen in order to measure infants and medical home status as the NPM already measures children 0-18.

**Numerator:**

The number of infants with special health care needs in the State identified by vital data base who have a medical home during the reporting period.

**Denominator:**

The number of infants with special health care needs in the State identified during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16.22: (Developmental) Care within a medical home

Increase the proportion of children with special health care needs who have access to a medical home.

**DATA SOURCES AND DATA ISSUES**

Vital export file used to survey families with high risk infants.

**SIGNIFICANCE**

Providing primary care to infants in a "medical home" is the standard of practice. Research indicates that children with a stable and continuous source of health care are more likely to receive appropriate preventive care and immunizations, are less likely to be hospitalized for preventable conditions, and are more likely to be diagnosed early for chronic or disabling conditions.

**PERFORMANCE MEASURE:**

The percent of youths with special health care needs who receive transition services to adult medical care

**STATUS:**

Active

**GOAL**

Increase the percent of youth with special health care needs, age 13 to 21, who have received the services necessary to transition to adult medical care.

**DEFINITION**

This SPM was chosen to specifically measure the transition to medical care age 13 to 25. The Kansas CSHCN program serves children up to age 21. NPM 6 looks at the broad definition of transition (health care, work and independence) for children 0-18.

**Numerator:**

Number of youth with special health care needs surveyed in the State age 13 to 25 whose doctors discussed shift to adult provider or who already see an adult provider.

**Denominator:**

Number of youth with special health care needs surveyed in the State age 13 to 25 during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16.23 Transitional service systems

Increase the proportion of States and jurisdictions that have service systems for children with or at risk for chronic and disabling conditions as required by Public Law 101-239.

**DATA SOURCES AND DATA ISSUES**

CSHCN Speciality Clinic database and survey of youth/families.

**SIGNIFICANCE**

The transition of youth to adulthood has become a priority issue nationwide as evidenced by the President's "New Freedom Initiative: Delivering on the Promise" (March 2002). Over 90% of CSHCN now live to adulthood, but are less likely than their non-disabled peers to complete high school, attend college or to be employed. Health and health care are cited as two of the major barriers to making successful transitions.

**PERFORMANCE MEASURE:**

The percent of CSHCN families that experience financial problems due to the child's health needs

**STATUS:**

Active

**GOAL**

Decrease the financial impact of special health care needs upon families.

**DEFINITION**

During the Kansas MCH needs assessment this measure was chosen as a priority for the next five years.

**Numerator:**

The number of children with special health care needs in the State whose families experienced financial problems due to child's health needs during the reporting period.

**Denominator:**

The number of children with special health care needs in the State during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16.23 Service systems

Increase the proportion of States and jurisdictions that have service systems for children with or at risk for chronic and disabling conditions as required by Public Law 101-239.

**DATA SOURCES AND DATA ISSUES**

National CSHCN Survey, 2001

**SIGNIFICANCE**

Having a child with special health care needs can affect a family's finances, employment status, and mental health. The demands on families may require that parents cut down their work hours or give up a job, at the same time that they face burdensome out-of-pocket health care costs.

 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

SP(New for Needs Assessment cycle 2011-2015) # 1

**PERFORMANCE MEASURE:**

The percent of women who receive prenatal care beginning in the first trimester of pregnancy with health insurance.

**STATUS:**

Active

**GOAL**

All women receive early and comprehensive health care before, during and after pregnancy.

**DEFINITION**

N/A

**Numerator:**

The number of live births to women who receive prenatal care during the first trimester by health insurance status during the reporting period.

**Denominator:**

The total number of live births during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16-6a. Increase in maternal prenatal care beginning in first trimester of pregnancy.  
1-1. Increase the proportion of persons with health insurance to 100%.

**DATA SOURCES AND DATA ISSUES**

Kansas certificate of live birth.

**SIGNIFICANCE**

Prenatal care includes three major components: risk assessment, treatment for medical conditions or risk reduction, and education. Each component can contribute to reductions in perinatal illness, disability, and death by identifying and mitigating potential risks and helping women to address behavioral factors, such as smoking and alcohol use, that contribute to poor outcomes. Prenatal care is more likely to be effective if women begin receiving care early in pregnancy. Health insurance is a critical factor in receiving early and adequate prenatal care, the bundle of services that support a healthy pregnancy and newborn. (Reference: HP2010)

<b>PERFORMANCE MEASURE:</b>	The percent of women in their reproductive years (18-44 years) who report consuming four or more alcoholic drinks on an occasion in the past 30 days.
<b>STATUS:</b>	Active
<b>GOAL</b>	Improve mental health and behavioral health of pregnant women and new mothers.
<b>DEFINITION</b>	<p>N/A</p> <p><b>Numerator:</b> The estimated number of women in their reproductive years (18-44 years) who report consuming four or more alcoholic drinks on an occasion in the past 30 days.</p> <p><b>Denominator:</b> The estimated number of women in their reproductive years(18-44 years) during the reporting period.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	16-17c. Increase in reported abstinence in past month from binge drinking by pregnant women to 100%
<b>DATA SOURCES AND DATA ISSUES</b>	Kansas Behavioral Risk Factor Surveillance System (BRFSS)
<b>SIGNIFICANCE</b>	The use of alcohol, tobacco, and illegal substances during pregnancy is a major risk factor for low birth weight and other poor infant outcomes. Alcohol use is linked to fetal death, LBW, growth abnormalities, mental retardation, and fetal alcohol syndrome (FAS). Overall rates of alcohol use during pregnancy have increased during the 1990s, and the proportion of pregnant women using alcohol at higher and more hazardous levels has increased substantially. (Reference: HP2010)

**PERFORMANCE MEASURE:** The percent of live births that are born preterm less than 37 weeks of gestation.

**STATUS:** Active

**GOAL** Reduce preterm and low birthweight births, and infant mortality.

**DEFINITION** Preterm births are defined as live births that occurred before the 37th week of pregnancy.

**Numerator:**  
The Number of resident live births born preterm less than 37 weeks of gestation during the reporting period.

**Denominator:**  
The Number of resident live births during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE** 16-11 Reduce preterm births to 7.6%.  
The U.S. baseline was 11.6% of live births born preterm less than 37 weeks of gestation (1998).

**DATA SOURCES AND DATA ISSUES**

Kansas certificate of live birth

**SIGNIFICANCE**

Perterm birth is a major determinant of infant mortality and morbidity and is the leading cause of death among newborns during the first month of life in the U.S. Infants born before 37 weeks gestation are at higher risk than infants born full-term for neurodevelopmental, respiratory, gastrointestinal, immune system, central nervous system, hearing and vision problems. Infants born preterm have longer hospital stys than full-term infants. Nationally, newborns with no complications stay an average of 1.5 days in the hospital, compared with an average of 13 days for preterm infants. Preschool and school-age children who are born preterm can also experience learning difficulties, and more behavioral problems later in life. Infants born very preterm (<32 weeks gestation) are at highest risk for death and life-long disability. (Reference: 2010 Rhode Island Kids Count Factbook.) Kansas baseline for 2002 was 8.7% of live births born preterm less than 37 weeks of gestation.

<b>PERFORMANCE MEASURE:</b>	The percent of infants exclusively breastfed at 6 months.
<b>STATUS:</b>	Active
<b>GOAL</b>	Increase initiation, duration, and exclusivity of breastfeeding.
<b>DEFINITION</b>	<p>Breastfeeding is defined as including any amount of breast milk in the infant's diet, regardless of additional food substances consumed by an infant. Exclusive breastfeeding is defined as ONLY breast milk - No solid, and no other liquids. Introduction of other substances to an infant such as formula, cow's milk, juice and solid foods in addition to breast milk does not qualify as "exclusive" breastfeeding.</p> <p><b>Numerator:</b> The number of Kansas infants who were exclusively breastfed at 6 months during the reporting period.</p> <p><b>Denominator:</b> The number of infants during the reporting period.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	16 -19b: Increase the proportion of mothers who breastfeed their babies at 6 months.
<b>DATA SOURCES AND DATA ISSUES</b>	CDC's National Immunization Survey (NIS).
<b>SIGNIFICANCE</b>	Human milk is the preferred feeding for all infants, including premature and sick newborns. Exclusive breastfeeding is ideal nutrition and sufficient to support optimal growth and development for approximately the first 6 months after birth. The advantages of breastfeeding are indisputable and include nutritional, immunological and psychological benefits to both mother and infant, as well as economic benefits. Kansas baseline was 13.8% of infants exclusively breastfed through 6 months (children born in 2005).

<b>PERFORMANCE MEASURE:</b>	The percent of children who receive care that meets the American Academy of Pediatrics (AAP) definition of medical home.
<b>STATUS:</b>	Active
<b>GOAL</b>	All children and youth receive health care through medical homes.
<b>DEFINITION</b>	<p>Medical Home as defined by AAP is derived from 19 questions asked in five core areas. These core areas ask parents whether the child has 1) personal doctor or nurse, 2) usual source for sick and well care, 3) family-centered care, 4) no problems getting needed referrals, and 5) effective care coordination when needed (including translation services). A child was defined to have a medical home if they answered yes to first core key areas and if needed answered yes to core areas 4 and 5.</p> <p><b>Numerator:</b> The estimated number of children who receive care that meets the (AAP) definition of medical home during the reporting period.</p> <p><b>Denominator:</b> The estimated number of children during the reporting period.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	16-22.(Dev.) Increase the proportion of children with ("SHCN") who have access to a medical home.
<b>DATA SOURCES AND DATA ISSUES</b>	National Survey of Children's Health
<b>SIGNIFICANCE</b>	Providing primary care to children and youth in a "medical home" is the standard of practice. Research indicates that children with a stable and continuous source of health care are more likely to receive appropriate preventive care and immunizations, are less likely to be hospitalized for preventable conditions, and are more likely to be diagnosed early for chronic or disabling conditions.

**PERFORMANCE MEASURE:**

The percent of students who had at least one drink of alcohol on at least 1 day during the 30 days.

**DEFINITION**

N/A

**Numerator:**

The baseline rate for U.S. was 44.7% of youth drank alcohol in the past month since the survey.

2611a. Reduction in high school seniors engaging in binge drinking during past 2 weeks. Objective Reduction in (adults and) adolescents engaging in binge drinking during past month 26-11d. Adolescents aged 12 to 17 years to 2.0%

**DATA SOURCES AND DATA ISSUES**

Youth Risk Behavior Survey (YRBS).

**SIGNIFICANCE**

Adolescent alcohol use remains a continuing problem for Kansas and the U.S. Young people between the ages of 12 and 20 are more likely to use alcohol than use tobacco or illicit drugs and drink considerably more on average per occasion, 5 drinks, than adults. The consequences of underage drinking include higher rates of risk sexual behaviors, injury (including car crashes), crime (including homicide, physical and sexual assaults), suicide, and death from alcohol poisoning. The baseline rate for Kansas was 42.4% of youth drank alcohol in the past month since the survey.

<b>PERFORMANCE MEASURE:</b>	The Percent of children who are overweight or obese.
<b>STATUS:</b>	Active

<b>DATA SOURCES AND DATA ISSUES</b>	Pediatric Nutrition Surveillance System (PedNSS),CDC, Kansas WIC Program - Table 2C, Summary of Health Indicators Children ages 2-<5. The PedNSS data will be used as a proxy measure.
<b>SIGNIFICANCE</b>	Maintenance of healthy weight is a major goal to reduce the burden of illness and its consequent reduction in quality of life and life expectancy. Patterns of healthful eating behavior need to begin in childhood and be maintained throughout adulthood. Overweight and obesity acquired during childhood or adolescence may persist into adulthood and increase the risk for some chronic diseases later in life. Kansas baseline for 2003 was 28.6%.

**PERFORMANCE MEASURE:**

The percent of children with special health care needs (CSHCN) who receive care that meets the American Academy of Pediatrics (AAP) definition of medical home.

**STATUS:**

Active

**GOAL**

All children with special health care needs (CSHCN) receive coordinated, comprehensive care within a medical home.

**DEFINITION**

This SPM was chosen in order to supplement and compare the results for medical home status already found in NPM 3. Medical Home as defined by AAP is derived from 19 questions asked in five core areas. These core areas ask parents whether the child has 1) personal doctor or nurse, 2) usual source for sick and well care, 3) family-centered care, 4) no problems getting needed referrals, and 5) effective care coordination when needed (including translation services). A child was defined to have a medical home if they answered yes to first core key areas and if needed answered yes to core areas 4 and 5.

**STATUS:**

Active

**GOAL**

YSHCN receive services necessary to make transitions to all aspects of adult life, including health care, work, and independence.

**DEFINITION**

This SPM was chosen to specifically measure the transition to medical care age 13 to 25. The Kansas CSHCN program serves children through age 21. NPM 6 looks at the broad definition of transition (health care, work and independence) for children 0-18.

**Numerator:**

The estimated number of YSHCN that the doctor or other health care providers usually or always encourage the youth to take responsibility for their health care needs.

**Denominator:**

The estimated number of YSHCN (ages 12-17).

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16-23. Increase the proportion of Territories and States that have service systems for children with special health care needs. The baseline rate for CYSHCN in U.S. with a medical home is 50.2%.

**DATA SOURCES AND DATA ISSUES**

National Survey of Children with Special Health Care Needs.

**SIGNIFICANCE**

The transition of youth to adulthood remains a priority to fulfill the vision contained in President George W. Bush's "New Freedom Initiative: Delivering on the Promise" (March 2002). Over 90% of CSHCN now live to adulthood, but are less likely than their non-disabled peers to complete high school, attend college or to be employed. Health and health care are cited as two of the major barriers to making successful transitions. The baseline rate for CYSHCN in Kansas with a medical home is 50.7%.

<b>PERFORMANCE MEASURE:</b>	The percent of children with special health care needs (CSHCN) families that experience financial problems due to the child's health needs
<b>STATUS:</b>	Active

<b>DATA SOURCES AND DATA ISSUES</b>	National Survey of Children with Special Health Care Need.
<b>SIGNIFICANCE</b>	Having a child with special health care needs can affect a family's finances, employment status, and mental health. The demands on families may require that parents cut down their work hours or give up a job, at the same time that they face burdensome out-of-pocket health care costs.
